

100%
Blood orange
Puree

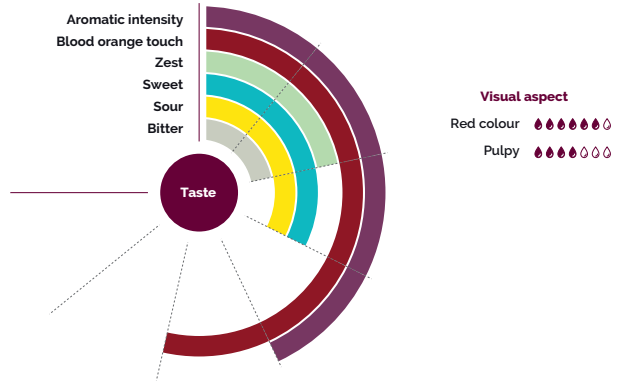

Fruitology®

100% blood orange puree

Ingredient: blood orange 100%

Origins

'Les vergers Boiron' blood orange puree is prepared from a blend of the Moro, Tarocco and Sanguinello varieties. They grow in volcanic earth in Sicily as well as in Morocco.

Pairing suggestions

Bitter orange, ginger, mandarin, sea buckthorn, Cointreau.

Colour

The red colour of the puree is due to the presence of pigments called anthocyanins. The fruit colour varies significantly from one year to the next and from one area to another. Blending is very important for maintaining a constant colour.

Taste

If the Moro variety provides the redness, the Tarocco offers the right sweet/acid balance. All the typical flavours and aromas of blood oranges are to be found in the puree.
